Dear Mr. Meadows:

A routine water pollution compliance inspection of Worlds of Fun, located at 4545 Worlds of Fun Avenue, Kansas City, Missouri, was conducted on June 16, 2015. The inspection was conducted by Patrick Peltz of the Missouri Department of Natural Resources' (department's) Kansas City Regional Office. Based on the findings observed during the inspection, Notice of Violation #KC2015061717064014 was issued to the facility for failure to comply with permitted effluent limits. A review of the facility's discharge monitoring reports between January 2010 and August 2015 found 109 exceedences, 75 of which were identified as being in significant noncompliance with permitted limitations.

A response to the inspection report was required by October 29, 2015. A response was received electronically on October 29, 2015, and by mail on November 2, 2015. The response adequately addressed the issues identified by the report, including facility repairs, researching alternative algaecides, and a commitment to obtain a full engineering assessment of the facility to evaluate any improvements necessary to ensure compliance at the facility.

Worlds of Fun also expressed an interest in establishing a mutually agreeable schedule with the department for completing these compliance actions. As such, the Kansas City Regional Office is referring this matter to the Water Protection Program's Compliance and Enforcement Section to facilitate a formal agreement between the department and Worlds of Fun.

If you have any questions, please contact Jesse Cochran at (816) 251-0799 in the Kansas City Regional Office, 500 Northeast Colbern Road, Lee's Summit, Missouri 64086-4710. The Water Protection Program may be contacted at (573) 751-1300 or Water Protection Program, P.O. Box 176, Jefferson City, Missouri 65102. Thank you for your cooperation in this matter.

Sincerely,

KANSAS CITY REGIONAL OFFICE
