

St. Louis Food Policy Coalition wants to hear from you about your interest in growing food in the city!

We want to learn from St. Louis residents 1) what you and your neighbors are already growing, 2) what types of agriculture activities you would like to see in the city, and 3) how you would like the activities to be regulated.

The survey will take approximately 10 minutes. Five participants will receive a gift bag of food and farm items from STLFPC!

We will use your feedback to help us draft an urban agriculture ordinance that addresses your needs and desires. To take the survey, visit this link: moenvironment.org/urbanagsurvey. Thank you!
